PROFESSIONAL SUMMARY

Flutter Developer with commercial experience building and maintaining cross-platform mobile applications. Experienced in Flutter/Dart, Clean Architecture, BLoC/Cubit, REST APIs, WebSockets, Firebase, and native Android/iOS integrations. Strong background in real-time applications, scalable architecture, performance optimization, and production-ready mobile development.

PROFESSIONAL EXPERIENCE

Flutter Developer **November 2025 – Present**
DevSparkClub

- Developing 2Arrowz, a social matchmaking mobile application focused on connecting users across multiple interaction spheres (friendship, romance, business, travel, etc.).
- Implementing complex matching and swipe-based interactions using custom animations and gesture handling.
- Building a real-time chat system including message lists, typing indicators, unread counters, scrolling logic, and custom input components.
- Developing an AI-powered assistant chat with animated responses, suggestions, and tailored UI behavior distinct from regular user chats.
- Managing application state using BLoC pattern to ensure predictable, scalable, and maintainable data flow.

Flutter Developer **May 2025 - October 2025**
Founders

- Developing and scaling Founders – a social networking platform for entrepreneurs that enables users to build professional connections, manage investments, and communicate in real-time.
- Implementing state management using the Bloc pattern for predictable, testable, and maintainable application flow.
- Utilizing WebSocket for real-time features such as instant chat messaging, live notifications for partner requests, and investment updates.
- Following Clean Architecture principles to ensure separation of concerns, modularity, and ease of future scalability.
- Designing and building reusable UI components for profile management, investment listings, partner requests, and chat modules following modern social app patterns.

Flutter Developer **February 2024 - April 2025**
gyber.org

- Developing and customizing a cryptocurrency wallet application using Flutter and Dart
- Integrating with blockchain technologies, particularly Ethereum, using web3dart to interact with smart contracts and fetch real-time wallet balances
- Responsible for implementing advanced UI/UX components like dynamic AppBars, balance displays, and token management sheets based on modern crypto UI patterns
- Managing state with Bloc pattern and ensuring scalability through clean architecture
- Collaborating in an agile environment to deliver secure and responsive cross-platform mobile experiences

KEY PROJECTS

Skin Cancer Detection App, Health Diagnosis Application

- Developed an AI-powered mobile application using Flutter and Clean Architecture.
- Integrated a Flask REST API with a machine learning model for image classification.
- Enabled users to capture or upload images for AI-based analysis.
- Integrated Firebase Authentication and cloud services.

EDUCATION

Bachelor of Software Engineering 2021 - 2025
Kazan Federal University, Russia

TECHNICAL SKILLS

- Mobile Development: Flutter, Dart, Java, Kotlin
- Architecture & State Management: Clean Architecture, MVVM, BLoC, Cubit, Provider, Riverpod
- Networking & APIs: REST APIs, Dio/HTTP, WebSocket, JSON
- Backend & Cloud: Firebase, Supabase
- Payments & Billing: In-App Purchases, Stripe, Google Pay, Apple Pay
- Maps & Location: Google Maps, Yandex Maps
- Development Tools: Git, GitHub, CI/CD
- Testing: Unit Testing, Widget Testing, Automated Testing

PROFESSIONAL SKILLS

- Clean Code & SOLID Principles
- Problem Solving
- Performance Optimization
- Mobile App Security
- Cross-Platform Development
- Responsive & Adaptive UI Development
- Code Review & Refactoring
- Debugging & Troubleshooting
- Agile Development
- Team Collaboration
- Time & Task Management
- Requirements Analysis

LANGUAGES

- Arabic (Native)
- Russian: Fluent
- English: B2
